

# for you mikrobiom analyse - Gemessene Werte

Stuhl pH-Wert
<b>Intestinales Mikrobiom:</b>
<b>Diversität:</b>
Diversität gesamt
Biodiversität (Shannon Index)
Stamm
Spezies
<b>Stämme:</b>
Actinobacteria
Bacteroidetes
Cyanobacteria
Euryarchaeota
Firmicutes
Fusobacteria
Proteobacteria
Tenericutes
Verrucomicrobia
<b>Ratios:</b>
Prevotella spp./Bacteroides spp.-Ratio
Firmicutes/Bacteroidetes-Ratio
Quotient Mucindegradation
Acetat - und Propionatproduktion
Butyratproduktion
Laktatproduktion
Mucindegradation
LPS-tragende Bakterien
<b>Actinobacteria:</b>
Bifidobacterium spp.
Bifidobacterium adolescentis
Bifidobacterium animalis
Bifidobacterium longum

Collinsella aerofaciens
Eggerthella spp.
Rothia spp.
<b>Bacteroidetes:</b>
Alistipes spp.
Bacteroides spp.
Bacteroides thetaiotaomicron
Bacteroides uniformis
Bacteroides vulgatus
Odoribacter spp.
Parabacteroides spp.
Prevotella spp.
Prevotella copri
Rikenella spp.
<b>Euryarchaeota:</b>
Methanobacteria
Methanobrevibacter spp.
Methanobrevibacter smithii
<b>Firmicutes:</b>
Anaerotruncus colihominis
Blautia hansenii
Butyrivibrio crossotus
Clostridium spp.
Clostridium difficile
Clostridium scindens
Coprococcus spp.
Dialister spp.
Dorea spp.
Enterococcus spp.
Eubacterium spp.
Faecalibacterium prausnitzii

Flavonifractor plautii
Fusibacter spp.
Lachnospira spp.
Lactobacillus spp.
Lactococcus spp.
Oscillibacter spp.
Oscillospira spp.
Pseudobutyrvibrio spp.
Pseudoflavonifractor spp.
Roseburia spp.
Ruminococcus spp.
Ruminococcus torques
Staphylococcus spp.
Streptococcus spp.
Streptococcus thermophilus
Veillonella spp.
<b>Fusobacteria:</b>
Fusobacterium spp.
Fusobacterium nucleatum
<b>Proteobacteria:</b>
Bilophila wadsworthia
Citrobacter spp.
Desulfobacter spp.
Desulfovibrio spp.
Desulfovibrio piger
Desulfuromonas spp.
Enterobacter spp.
Escherichia spp.
Escherichia coli
Hafnia alveii
Klebsiella spp.

Oxalobacter formigenes
Proteus spp.
Providencia spp.
Pseudomonas spp.
Serratia spp.
Sutterella spp.
<b>Verrucomicrobia:</b>
Akkermansia muciniphila
Anaerotruncus spp.
<b>Pilze:</b>
Candida spp.
Candida albicans
Geotrichum candidum
Saccharomyces cerevisiae
Aspergillus fumigatus
Aspergillus niger
Schimmelpilze
<b>Milchsäurebakterien:</b>
Bifidobacterium dentium
Lactobacillus brevis
Lactobacillus paracasei
Lactobacillus plantarum
